

Fair Texas Title

**2017-2018
North Texas School Ratings**

How the scoring works

UNDERSTANDING OVERALL PERFORMANCE

This report card is designed to tell us how well we are helping students reach grade level and how well we are preparing them for success after high school. Much like the grades we give students, we can use these grades to identify ways to help schools improve over time.

Overall grades for schools are calculated based on performance in three key areas, or domains. We take the higher score between how much students know and can do (Student Achievement) or how much better students are doing than last year or than peers in similar schools (School Progress). We then consider whether performance gaps exist among different groups of students (Closing the Gaps).

This design reflects a commitment to recognizing high student achievement and the impact of highly effective educators while maintaining focus on the students most in need. Ratings options for the overall score out of 100 are:

Met Standard: 60–100

Improvement Required: 0–59

STUDENT ACHIEVEMENT

Student Achievement shows how much students know and are able to do at the end of the school year.

SCHOOL PROGRESS

School Progress shows how students perform over time and how that growth compares to similar schools.

CLOSING THE GAPS

Closing the Gaps shows how well different student groups within a school are performing.
